

Ready to make a change and be part of an exciting journey with a clinical stage biotechnology company focused on developing the next evolution of oncolytic immunotherapy for patients with advanced cancer? At CG Oncology, we aim to take the next evolutionary step in delivering innovative cancer care to millions of patients in need worldwide. Together, we are growing rapidly and looking to build a solid foundation of exceptional individuals who share our passion.

Essential Functions of the Job

- The Clinical Data Manager is responsible for managing and overseeing all Clinical Data Management (CDM) activities for assigned studies required to meet corporate goals and timelines.
- This incumbent is responsible for the execution of clinical data capture, data review and cleaning, DM documentation, as well as study specific vendor management from study start-up to database lock.
- This incumbent is responsible for demonstrating the ability to ensure an investigation is conducted according to GCP regulations and internal control documents to protect the rights, safety, and well-being of subjects and the accuracy and validity of the trial data

Qualifications

- BS/BA in a relevant scientific discipline.
- Four (4) years of progressive clinical data management experience within the biotech/pharmaceutical industry or in a clinical research organization.
- At least two (2) years of oncology therapeutic area experience.
- Experience in CRO communications, oversight, and management.
- Knowledge of GCP, ICH Guidelines and use of good clinical data management practices.
- Ability to travel domestically/international as required (estimate <5%).
